INDEX TO VOL. XC

Alphabetic Table of Contents by Authors

ACTON, A. B., Crossing over within inverted regions in Chironomus, 63

AMERICAN SOCIETY OF NATURALISTS, address of president, 145; reports, 139

BARDACH, JOHN E., The sensitivity of the goldfish (*Carassius auratus L.*) to point heat stimulation, 309

BEACH, FRANK A., and JULIAN JAYNES, Studies on maternal retrieving in rats: II. Effects of practice and previous parturitions, 103

BENNETT, J. H., Modes of tetrad formation, 195

BLOCH, ROBERT, book notices, 144, 205

BRAUN, ARMIN C., A study on the nature of autonomy in neoplastic plant cells, 227

BROWER, LINCOLN P., and JANE VAN-ZANDT BROWER, Cryptic coloration in the Anthophilous moth *Rhodopsa masoni*, 177

CAIN, A. J., and P. M. SHEPPARD, Adaptive and selective value, 202

DEMPSTER, EVERETT R., Comments on Professor Lewontin's article, 385

DEXTER, RALPH W., The early *American Naturalist* as revealed by letters to the founders, 209

DOBZHANSKY, THEODOSIUS, What is an adaptive trait?, 337

DUNN, L. C., Mutual aid and evolution (book review), 381

FELL, HONOR B., Comments on Dr. White's article on tissue culture, 61

FROTA-PESSOA, O., A mutant in *Drosophila pseudoobscura* which alters the pigmentation of the testicular envelope without changing that of the eyes, 133

GARBER, E. D., A Nutrition-inhibition hypothesis of pathogenicity, 183

GLASS, BENTLEY, The significance of differences between genotypic frequencies and phenotypic frequencies, 395

GRANT, VERNE, The influence of breeding habit on the outcome of natural hybridization in plants, 319

GROSCH, DANIEL S., Lethality induced by feeding radiophosphorus to male Habrobracon, 200

GUNTER, GORDON, A description of a red drum, *Sciaenops* ocellata, without eyes, with a consideration of the implications, 267

HYMAN, L. H., book notice, 335

JACOBS, WILLIAM P., Internal factors controlling cell differentiation in the flowering plants, 163

KENWORTHY, WALTER, The effect of oxygen concentration on the dose-action survival curves for irradiated Habrobracon eggs, 119

KHISHIN, AZIZ F., Induction of mutations by formaldehyde solutions in *Drosophila melanogaster*, 377

KIMBALL, A. W., Approximate confidence intervals for specific locus mutation rates, 369

KOREF, SUSI E., Melanotic tumors in Drosophila as possible phenodeviants, 270

KUSNEZOV, N. N., A comparative study of ants in desert regions of Central Asia and of South America, 349

LEVINE, R. P., Crossing over and inversions in coadapted systems, 41

LEWIN, RALPH A., Problems of sex in unicellular algae, 331

LEWONTIN, R. C., Studies on homeostasis and heterozygosity. I. Abdominal bristle number in second chromosome homozygotes of *Drosophila melanogaster*, 237; A reply to Professor Dempster's Comments on homeostasis, 387

MOORE, JOHN A., A rejoinder to Rabb and Mosimann's letter, 391; book notice, 333

NANNEY, DAVID L., Caryonidal inheritance and nuclear differentiation, 291

OSTER, I. I., and F. H. SOBELS, "Natural implantation" of a lethal mutation in *Drosophila melanogaster*, 55

PLOUGH, H. H., Datura research material available, 394

PUBLICATIONS RECEIVED, 143, 205, 333

RABB, GEORGE B. and JAMES E. MOSIMANN, Taxonomic criteria in Australian frogs, 389

RENSCH, BERNARD, Increase of learning capability with increase of brain-size, 81

ROBINSON, H. F., R. E. COMSTOCK, A. KHALIL, and P. H. HARVEY, Dominance versus over-dominance in heterosis: Evidence from crosses between open-pollinated variaties of maize, 127

RUSSELL, W. L., Comparison of X-ray-induced mutation rates in Drosophila and mice, 67

SCHALET, ABRAHAM, A second case of translocation between paternal and maternal chromosomes, 329

SCHWARTZ, DREW, and CLELLA E. BAY, Further studies on the reversal in the seedling height dose curve at very high levels of ionizing radiations, 323

SMITH, STANLEY G., Cytotaxonomy of Curculionidae (Coleoptera), 137

STANLEY-JONES, D., Axial rotation and the origin of vertebrates, 361

STEPHENS, S. G., The composition of an open pollinated segregating cotton population, 25

STRAW, RICHARD M., Floral isolation in Penstemon, 47

THIMANN, KENNETH V., Twin themes of physiology, 145
TRINKAUS, J. P., The differentiation of tissue cells, 273
WHITAKER, THOMAS W., The origin of the cultivated Cucurbita, 171
WHITING, P. W., and MARION KAYHART, Mutations at a single locus in the wasp Mormoniella, 111
WRIGHT, SEWALL, Modes of selection, 5
YARWOOD, C. E., Generation time and the biological nature of viruses, 97
ZWILLING, EDGAR, Reciprocal dependence of ectoderm and mesoderm during chick embryo limb development, 257

Subject Index

adaptations, 13
adaptive traits, 337
adaptive value, 202, 385, 387
American Naturalist, history of, 209
American Soc. Nat.
  Secys report, 139
  president's address, 145
  symposium, 163, 227
auxin, 148, 163, 231

brain size, and learning, 81

Carassius auratus, 309
caryonidal inheritance, 291
Cavia cutleri, 9
chick embryo, limb development, 257
chironomus species, 63
confidence intervals, 369
conjugation,
  in ciliates, 292
cotton, 25
Crinia signifera, 389, 391
Crinia insignifera, 389, 391
crossing over
  and inversions, 41
  in chironomus, 63
crown gall, 228
cryptic coloration, 177
Cucurbita,
  origin of, 171
Curculionidae cytotaxonomy, 137
cytotaxonomy, 137

Datura, research materials, 394
development,
  of limbs, 258
differentiation,
  in plants, 163
  in tissue cells, 273
  nuclear, 291
dominance
  and heterosis, 127
Drosophila, 69
  willistoni, 337
  paulistorum, 337
  equinoxialis, 337
  tropicalis, 337
  melanogaster, 55, 237, 270, 329, 377
  pseudobscura, 41, 133

eggs,
  effects of radiation, 119
elephant,
  learning in, 89
evolution,
  of behavior, 91

formaldehyde as mutagen, 377

generation time
  of viruses, 97
genes and development, 343
gene frequencies, 37
Gilia species, 319
goldfish, heat sensitivity, 309
guinea pig, 9

Habrobracon
  effect of oxygen, 119
  effect of radiophosphorus, 200
heterosis,
  in maize, 127
homeostasis, 237, 346, 385, 387
hybridization, in plants, 319
Hylobius species, 137

inhibition,
  in plant physiology, 145
  and pathogenicity, 183, 190
introgressive hybridization, 21
isolating mechanisms, 51

learning capacity, 81
lethality,
  in Habrobracon, 200
limb development
  in chick embryo, 257

maize,
  heterosis, 127
  effect of radiation, 323
maternal behavior, 103
Mormoniella, 111
mouse,
  mutation rates, 69
  behavior, 88
  reaction to pathogens, 185
mutants,
  in Drosophila, 133
  in chicken, 260
mutation,
  induction of, 111, 377
  rates of, 69, 369
  macro, 20
  lethal, 55, 111

Neoplastic
  in plants, 227
nucleus, differentiation, 291, 304
nutrition,
  and pathogenicity, 183

overdominance,
  in maize, 127
oxygen,
  effects on egg survival, 119

Paramecium aurelia, 291
parasitism, 191
Penstemon,
  floral isolation in, 47
phenodeviants,
  in Drosophila, 270

physiology,
promotion and inhibition, 145
plant hormones, 163, 231
plant neoplastics, 227
plant, hybridization, 319
pleiotropism, 6, 342
pollinating agents, 48
polyploidy,
in plants, 321

radiation,
and mutation, 69, 111, 329
and oxygen, 119
and growth, 323
radiophosphorus
and lethality, 200
rat,
behavior, 88, 103
Red drum,
eyeless, 267
Rhododipsa masoni, 177

Scianops ocellata
eyeless, 267
selection, 5, 202
interdeme, 16
selective value, 202
sex, in algae, 331
sibling species, 337
synergism
and inhibition, 159

taxonomic criteria, 389
tetrad formation, 195
Tetrahymena pyriformis, 291
tissue culture, 61, 274
translocations,
in Drosophila, 329
tumors,
in plants, 227
in Drosophila, 270

virus,
generation time, 97

wound healing, 235
